EDUCATION

**Designed to be good for your  
body and good for your brain.**

Introducing Brody™.

## Campus study spaces leave students unsupported.

Teaching methods are evolving, trending toward active learning and increased use of technology. Learning spaces designed for project work and collaboration have left little space for focus and study, which is still critical for individual learning.

### COMFORT IS COMPROMISED

While most lounge spaces look comfortable, they provide little ergonomic support. Designed for short-term seating, not focused task work, typical lounge seating leaves the body unsupported.

### LEARNING IS COMPROMISED

Students need more than chairs, alone, to get work done. They need surfaces for their notebooks and mobile devices.

### FOCUS IS COMPROMISED

Campus study spaces are often open and exposed, providing little to no control over visual distractions.

## Designed for your body.

Providing high-performance comfort and support, Brody™ features patented LiveLumbar™ technology—bringing thoughtful ergonomic design to the lounge posture. The adjustable, personal worksurface holds technology at eye level, reducing neck and shoulder strain.

## Designed for your brain.

Our attention has limited capacity. Like any other organ, the brain takes energy to function. The harder we try to ignore distractions, the harder our brains have to work to filter what's important and what's not.

Brody™ creates a shelter from visual distractions, providing privacy and an enhanced sense of psychological security.

## Designed for work.

Brody™ creates a comfortable micro-environment by thoughtfully integrating ergonomic comfort and personal storage —so students can focus their attention, get into flow and get work done.

## Designed for the campus.

Brody™ can help schools, colleges and universities optimise their real estate by delivering a high-performance space in a highly efficient footprint. These moveable modular solutions can transform underutilised libraries and in-between spaces into covetable destinations.

# Design Details

## PRIVACY SCREEN

Privacy screens help reduce visual distractions and enhance personal privacy and comfort.

## ADAPTIVE BOLSTERING

Brody™ seat allows the cushion to adapt to each user's unique size. Adaptive bolstering provides exceptional seat comfort.

## PERSONAL WORKSURFACE

With up to 40° of pitch, this highly-adjustable worksurface lets you position your work and your devices precisely where you want them.

## SIDE SURFACE

Available with left- or right-sided configurations, side surface provides a convenient armrest, or a spacious writing or mousing surface.

## PATENTED LUMBAR TECHNOLOGY

Patented LiveLumbar technology provides dynamic back support that eliminates lower back gap.

## FOOTREST

Additional support for legs and feet helps maintain comfortable, reclined postures, with a nonslip surface that prevents movement. Footrest fits under the seat when not in use.

**STATEMENT OF LINE**

**SUSTAINABILITY**

At its heart, sustainability at Steelcase is about people. It's about creating and supporting the economic, environmental and social conditions that allow people and communities to reach their full potential.

**Research and insights direct our path.** It's not only about creating goods, it's about creating good. It's not only about creating value, it's about living our values. It's not just about reducing our footprint, it's about expanding our reach. It's about creating lasting and meaningful change to enable the long-term wellbeing of current and future generations.

**Innovative products and solutions result.** In the development of our products, we work to consider each stage of the life cycle: from materials extraction, production, transport, use and reuse, until the end of its life. We demonstrate performance through third-party verified certifications and voluntary product declarations.

Steelcase's sustainability promises, actions, and results are communicated in an annual Corporate Sustainability Report.
