

Leap  24|7|

Steelcase

# Leap

## technical description

Extreme work situations call for **high performance worktools**, such as Leap 24/7, our most effective chair yet.

### Durability and robustness

Complies with all **European standards**

The British standard BS 5659 is **suitable for use 24 hours a day**, which is up to 3 times as long as the European standards

**200,000 and 500,000 martindale**

**Robust enough for intensive use 24 hours a day**

**Up to 150kg** (33% more than the European Standard EN1335)

**Headrest** (optional) adjustable in height: range 60mm

**Calorific power:** 361Kj/Kg

**Upholstery:** HR moulded foam, min. density 50kg/m<sup>3</sup>

Seat: covering fastened using M.S. Gex process

Back: moulded fibre backrest cushion (recycled PET)

### Breathability

**Excellent thermal comfort** around the clock:

air slats in the seat and backrest,

breathable foam body

### Sustainability

**EPD** Environmental Product Declaration (EPD)

"NF Environnement" certification

**McDonough Braungart Design Chemistry's (MBDC)  
Cradle-to-Cradle™ Product Certification –Silver.**

This certification recognizes the implementation of ecologically intelligent materials and cradle-to-cradle product design.
